

VERSION 2.1.0.1 SUMMARY REVISIONS

Since the release of EngAsst Version 2.1.0.0, several error reports and user requested enhancements have been received. This release of EngAsst Version 2.1.0.1 contains the following revisions:

1. The installation of EngAsst has been modified to include RunProgDLL.DLL, a library that is needed on some machines to allow newer versions of the engineering programs to run. (Request 248)
2. The configuration files for BOX5 and LLBOX have been updated to provide correctly formatted input. (Request 253)
