BAR7 Computer Program
RE: BAR7 Version 7.11.0.9 Release Notice
No. 007
DATE: February 3, 2006
=====

PENNDOT has converted all engineering programs to a new Fortran Compiler. BAR7 v7.11.0.9 was the first converted engineering program to be released. After the initial rollout it was discovered that under some circumstances the program could not start when run via the Engineering Assistant. This problem was due to compiler runtime module access. There was never a problem with the BAR7 v7.11.0.9 program itself. The problem has been addressed by updating one Engineering Assistant DLL file. Licensed users may now proceed to download the update installation package from the PENNDOT LRFD and Engineering Programs support web site at <http://penndot.engrprograms.com>
