Updating of E-mail Addresses

Several PENNDOT subscribers have contacted me regarding changes to their email address due to the transition to CWOPA. Specifically, they wanted to know whether or not they were responsible for having to manually change their e-mail address in order to keep receiving these e-Notifications.

Please be advised that as of today, the e-mail addresses for all PENNDOT personnel (old e-mail domain of "@dot.state.pa.us") currently on the subscription list have been updated to the new CWOPA addresses. We will be contacting some PENNDOT people individually to verify their correct CWOPA address.

For design consultants and other non-PENNDOT individuals on the subscription list whose e-mail address changes for any reason in the future, you can either 'unsubscribe' under the old email address and re-subscribe with the new address, or simply send an e-mail to the list server regarding any change and we will update our records. To send an e-mail to the list server, simply address the message to:

penndot-engrprograms@listserver.bakerprojects.com

When an e-mail is sent to the list server, please be advised that your message is sent to the moderators of the list server only. Your message will never be sent directly to everyone on the list. Currently, there are only three moderators — Bill Smyers of Baker Engineers, Has Mukh Lathia of PENNDOT BIS and me. If you bring up an issue that we believe will be of interest to the group, we will prepare and distribute a formal e Notification.

If you have any questions concerning the above issues, please contact:

Ralph J. DeStefano, P.E.
